

Simmons & Simmons MiFID2 Manager

The essential tool to stay on top of MiFID2 reform...

The MiFID2 Manager is a practical tool to guide you through the steps that need to be taken to stay on top of the requirements of MiFID2/MiFIR and its implementing legislation.

- Are you finding it challenging to follow the MiFID2 legislative process? „
- Do you find it difficult to track the practical steps you need to take to comply? „
- Do you worry about missing something or being out of line with the market?

Simmons & Simmons **MiFID2 Manager** is a practical tool to assist you with all of the above.

How will it help me?

The MiFID2 Manager will focus on the EU Level 1 and 2 text but will also look at local implementation/gold plating issues in the UK and other jurisdictions as local implementation takes off in 2016.

The MiFID2 Manager will provide you with key information on how a particular MiFID2/MiFIR requirement applies: „

- to your firm type „
- to particular services or activities „
- to particular client types

It then provides a step by step list of action points for you to consider in order to ensure compliance, and also includes features which allow you to use it as an internal checklist/project management tool.

Regular updates

Updates including legislative changes, key local implementation changes, legal certainty issues as well as practical action points will be made on a monthly basis, with updates to the previous version flagged for your convenience.

Interested?

Access to the MiFID2 Manager is via subscription. Each subscription is on a group basis with an unlimited number of users. The initial one-off subscription fee is GBP10,000 and the monthly update fee is GBP1,500. The minimum subscription period is until the end of 2017. All fees shown are exclusive of VAT.

To subscribe to the service, or if you would like a demonstration, please [contact us](#).
