

Africa Mining Legal Database

Our Africa Mining Legal Database has been developed in conjunction with local counsel in response to demand from investors, financiers and developers evaluating and/or developing African mining projects for clear, accurate and easily accessible information on the key legal issues to consider and be aware of in jurisdictions across Africa.

Available on a subscription basis, this service covers more than 35 jurisdictions across Africa, increasing to 45, and is based on information provided by local counsel that is reviewed and updated regularly, and has been analysed by Simmons & Simmons.

This Africa Mining Legal Database helps you to understand in each jurisdiction:

- the key mining laws and government entities
- the mining rights that can be acquired and their key terms
- local content restrictions
- optimal business structures for your investment
- regulation of transfer of funds, processing, sales etc.
- the taxation regime for mining companies
- the key environmental, health and safety and social responsibility laws
- the issues to consider in protecting your rights and dealing with disputes, and
- many other key issues.
